

VENTRAL ROPE CLAMP

AFX204101

Chest Ascender is a compact and durable chest-mounted rope clamp designed for use in vertical rope climbing systems. Engineered for smooth upward movement and positive locking, it is ideal for rope access & rescue.

Features

- Mechanical device which when attached to a Kernmantle rope, will lock under load in one direction and slip freely in the opposite direction.
- Specially designed for easy connection on user's harness by webbing strap or a connector.
- One-Handed Operation: Cam can be easily opened with one hand for rope insertion or removal.
- Secure Cam Lock: Prevents accidental disengagement from the rope during ascent.

How To Use
