

PRODUCT FEATURE HIGHLIGHT

AFG805103 STAINLESS STEEL ROPE GRAB WITH BUILT-IN SHOCK ABSORBER

The **Stainless Steel Rope Grab** is specifically engineered for use in conjunction with the **AFF7500 Vertical Lifeline System**, delivering reliable fall protection performance for users working at height.

A key feature of this rope grab is **developed with an integrated shock absorber, which also acts as a fall indicator once deployed**, allowing for immediate and easy identification after fall arrest activation. This **provides an added layer of safety management** by ensuring the equipment can be quickly inspected and removed from service when necessary
