Client : PT Panasonic Manufacturing Indonesia
Project name : Overhead Lifeline System for Loading/Unloading Activities
Products used : AFF4000 Overhead Lifeline System w/ Brute SRL Series

Background

Panasonic Manufacturing Indonesia is a home appliance manufacturer that markets its products under the well-known PANASONIC brand. As part of their manufacturing process, operators are required to climb onto trucks to load and unload raw materials and finished goods. These activities are classified as Work at Height, which increases the potential for fall hazards. Panasonic places a strong emphasis on safety, with regulations in place to protect workers. In line with their commitment to achieving zero accidents, the company is making additional efforts to improve safety conditions for work at height.

Requirement

To enhance safety, an overhead lifeline system combined with a Self Retracting Device was required to ensure the safest conditions for operators working above the trucks. Another key requirement was that the system align with how the trucks were parked, making access both simple and safe. Additionally, it was mandated that all operators receive training on the use of the overhead system, which was provided by KStrong. The installation team was also required to be certified for work-at-height installations and equipped with the appropriate PPE during the installation process.

KStrong Solution

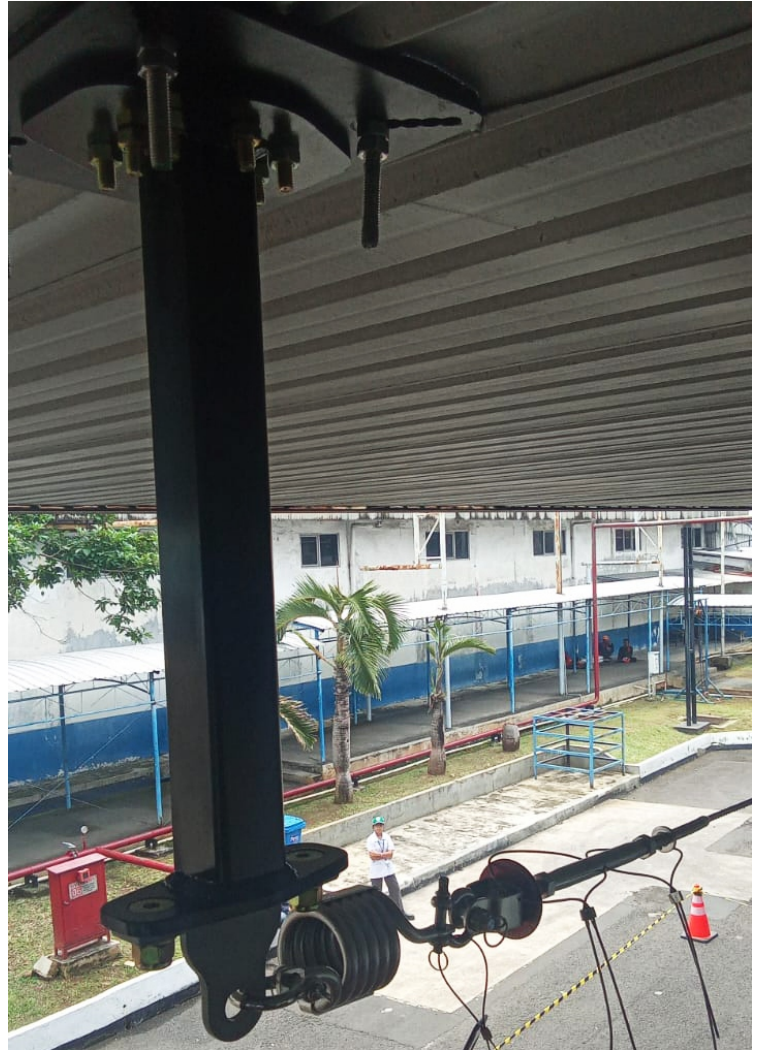

KStrong recommended the AFF4000 Overhead Lifeline System combined with Brute Self-Retracting Lifelines (SRLs) of varying lengths, ranging from 6 to 10 meters, to accommodate the different heights in the area. In addition, KStrong provided the Elite Full Body Harness along with an extended D-ring lanyard, making it easier to attach the SRL to the harness for added convenience and safety.

About KStrong

The founders of KStrong have been successfully manufacturing personal protective equipment globally for over 20 years. With the support of a large team of highly experienced research and product development specialists along with global manufacturing facilities, KStrong is poised to become the preeminent brand of choice for personal protective safety products. KStrong takes pride in assuring careful measures to ensure all products meet applicable government codes and professional standards, such as EN, AS/NZS and ANSI. We look forward to helping your company protect its most valued possession, its workers!
