

SHARP EDGE SRL ADVANTAGES

Understanding the Difference vs. Standard SRL's

Work Application

Standard SRL: Designed for overhead anchorage points, keeping the lifeline directly above the worker
Sharp Edge SRL: Suitable to use Horizontally or required to work near an edge

Edge Exposure

Standard SRL: Not rated for sharp edges – the lifeline could fray or fail if it runs across an edge
Sharp Edge SRL: Tested and rated to withstand edge impact & abrasion

Fall Clearance

Standard SRL: Requires overhead anchorage to minimize free fall distance
Sharp Edge SRL: Used with foot-level anchors and provides extra energy absorption during a fall

Standards

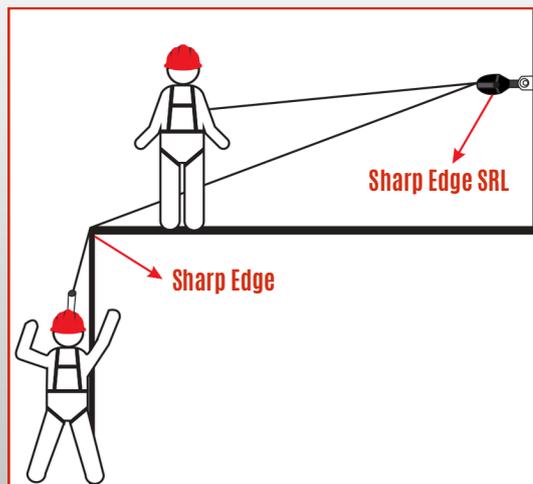

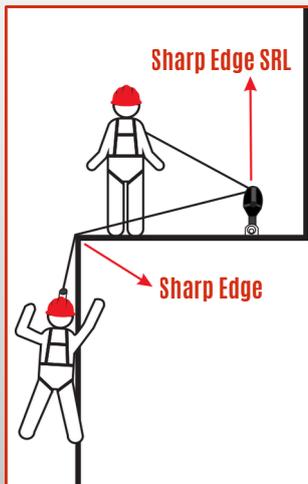

Standard SRL: Certified for overhead use only
Sharp Edge SRL: Rated for both sharp edge & overhead use

Feature Comparison at a Glance

Features	Standard SRL	Sharp Edge SRL
Edge Rating	Not edge-rated	Edge-rated
Anchor Location	Overhead only	Horizontal, Overhead & foot-level
Free Fall Distance	Minimal	Higher (foot-level)
Energy Absorber	Internal	External Shock Absorber
Cable/Webbing	Standard strength	Higher Strength
Standard	AS/NZS 1891.3 2020 EN 360:2023	AS/NZS 1891.3 2020 EN 360:2023 VG11 RFU #11.060

When to Use a Sharp Edge SRL

Use a Sharp Edge SRL when working near roof edges, decks, or structures where the lifeline might contact an edge.

Block can be installed at foot level, in case installed near sharp edge having radius $\geq 0.5\text{mm}$

It can also be used for horizontal usage at 140kg.

It can be used on the sharp edges having radius $\geq 0.5\text{mm}$
*140Kg max.

Product List (all SRL's include ANSI quarter turn steel karabiner and tagline)
