

Declaration of Conformity

In Accordance with ANSI/ISEA 125-2014 and ANSI/ASSP Z359.7-2019

Declaration #: DOC-UFC404500 **Declaration Date:** 04/16/2020

Item #: UFC404500

Description: KStrong® Steel Swivel Snap Hook with Load Indicator (ANSI)

Brand Name: KStrong **Manufacturer:** KStrong

Address: 18505 Intercontinental Crossing, Houston, TX 77073

Additional Items Conforming Under this Declaration (If Applicable):

KStrong declares that the product(s) listed above is in conformity with the requirements of the following performance standard(s):

ANSI Z359.12-2009

Conformity Assessment Method in accordance with ANSI/ISEA 125-2014

Level 1:

KStrong Lab Outside the Scope of ISO/IEC Standard 17025:2017

Level 2:

KStrong Lab Within the Scope of ISO/IEC Standard 17025:2017

Level 3:

Independent 3rd Party Lab accredited to ISO/IEC Standard 17025:2017

Supporting Documentation: KS-Test-UFC404500.pdf

This Certificate is a guarantee that the above standard(s) was met by the requirements of such standard. Testing was performed under normal operation mode. The results of testing apply only to the particular sample tested and the specific test carried out. This Certificate is only issued for products which have passed the testing requirements of listed standard(s).

TESTING OF

VARIOUS SNAPHOOKS AND CARABINERS

TO CLIENT SPECIFIED SECTIONS OF ANSI/ASSE Z359,12-2009

REPORT EXTENSION RENDERED TO:

KSTRONG LLC 17330 PRESTON ROAD #200 D DALLAS,TX 7525

An Independent Organization Testing for Safety and Performance

This report is for the exclusive use of Intertek's Client and is provided pursuant to the agreement between Intertek and its Client. Intertek's responsibility and liability are limited to the terms and conditions of the agreement. Intertek assumes no liability to any party, other than to the Client in accordance with the agreement, for any loss, expense or damage occasioned by the use of this report. Only the Client is authorized to permit copying or distribution of this report and then only in its entirety. Any use of the Intertek name or one of its marks for the sale or advertisement of the tested material, product or service must first be approved in writing by Intertek. The observations and test results in this report are relevant only the sample tested. This report by itself does not imply that the material, product or service is or has ever been under an Intertek certification program.

Abstract

Various Snaphooks and Carabiners were submitted by PN International for testing and evaluation. They were evaluated in accordance with the client specified sections of ANSI/ASSE Z359.12-2009 entitled, "Connecting Components for Personal Fall Arrest Systems". **Note:** The following referenced models have not been evaluated by Intertek. It is Intertek's understanding that PN International/Karam has evaluated these samples to verify all similarities in design to the model that was tested

Introduction

This report describes the results of the test program conducted in accordance with the client specified sections of ANSI/ASSE Z359.12-2009 entitled, "Connecting Components for Personal Fall Arrest Systems" performed on specimens submitted by PN International. Intertek, located in Cortland NY conducted the test evaluations. Testing was conducted from March 01, 2012 through March 23, 2012. Additional testing was conducted October 10, 2012 through October 23, 2012, November 5, 2012, February 1-13, 2013, April 1 & 8, 2013 and August 17,2016.

Product Description

Production samples of various snaphooks and carabiners were received in new, unused condition for this evaluation on February 14, 2012, February 15, 2012, September 25, 2012, October 30, 2012, January 21 & 29, 2013 and July 13, 2016. Below is a list of samples used for the testing.

Table #	Model #	Qty Each	Description
1	UFC404500	15 (12*)	Forged Swivel Snaphook w/ Load Indicator
4	UFC404150	15 (1*) (3**)	Stamped Steel Snaphook
6	UFC405100	15 (1*)	Steel Snaphook
8	UFC401101	15 (1*)	Quarter Turn Locking Steel Carabiner
9	UFC401100	15 (1*)	Steel Quarter Turn Locking Carabiner

^(*) retest samples submitted September 25, 2012

Authorization

This investigation was authorized by signed quotation # 500353560, dated January 09, 2012, quotation # 500378949, dated May 08, 2012, quotation # 500428682, dated January 10, 2013, quotation # 500442428, dated March 20, 2013, and quotation # Qu-00698322, dated June 21, 2016.

Report No.: G103936766CRT-003 KSTRONG LLC

TABLE 9	: UFC401100							
Paragraph	Test Description/Requirements Results		Pass/Fail					
	5.1 General Marking Requirements: 5.1.1; Markings shall be in English	1: English						
	5.1.2; Legibility and attachment shall endure for the life of the component.	2: Stamped						
	5.1.3; mark any restrictions of use	3: NA						
	5.2.1 Specific Markings for Connectors:	1. K1312, 16 KN		P				
5	Connectors shall be marked as described below: 1. year of manufacturer	2. K	*rete	*retest samples				
	 manufacturer's identification markings for connectors shall be sufficient to provide traceability. 	3. "K" Codes						
	4. load rating for the major axis5. load rating for the gate stamped	4. 5M						
	6. For connectors that are non-integral, include the standard number.	5. 3600 lbs						
		6. ANSI Z359.12						
	5.3 Specific Instruction Requirements	Integral to harness?						
	5.3.1; Instructions shall include: (for non-integral products)	NO						
	 the material used in the connector construction the size of the connector and dimensions affecting its 	Instructions provided:						
	compatibility with objects to which it way be connected 3. the need to make only compatible connections and	1. Alloy Steel, Galvanized 2. Chart, page 2-3 of manual						
	limitations of compatibility	3. Page 3-5 of manual	P					
	4. proper method of coupling the connector and checking that it is closed and locked	4. Page 6 of manual 5 Chart, page 2-3 of manual						
	5. the minimum strength of the connector body when loaded in the direction set forth in the applicable sections	6. Chart, page 2-3 of manual						
	of the standard 6. the minimum strength of carabiner and snaphook gates when loaded in the directions set forth in section 3.1.1.3							

<u>Conclusion</u>
The evaluation of the various Snaphooks and Carabiners described in this test report *per the clients specified testing* to sections of ANSI/ASSE Z359.12-2009 entitled, "Connecting Components for Personal Fall Arrest Systems" is complete.
