BRUTE
BACKER™ LE
WE'VE GOT YOUR BACK.

WELCOME TO UNRIVALED SAFETY

With the support of over 4500 employees worldwide and nearly 50 acres of manufacturing production under roof, KStrong is best positioned to help your company protect its most valuable assets, its employees. In addition to meeting all applicable OSHA fall protection codes in the USA, KStrong is one of the few elite manufacturers that provides the highest certifications to the ANSI fall protection standards, Level 3!

In our continued growth as a full-service provider of fall protection, we have added several new products including K-Rail™ guardrails and a premium harness range, EndurX™.

As one of the world's largest full-service providers of fall protection, we can help your company tackle and solve even the most difficult fall hazards, those where traditional fall protection solutions come up short. KStrong Services Group (KSG) offers Engineering, Training and Consulting services to help your company comply with all OSHA fall hazard requirements.

We look forward in 2025 and beyond to keeping your employees safer while working at elevation and in confined spaces!

Sincerely,

A handwritten signature in black ink, reading 'John H. Kemp Jr.', written in a cursive style.

John Kemp
President KStrong USA/Canada

SELF-RETRACTING LIFELINES

KStrong is proud to offer a full range of ANSI rated Class 1 and Class 2 self-retracting devices to help workers meet nearly every user requirement covering a wide variety of applications. KStrong's Micron™ and BRUTE™ brands have become the preferred choice in construction, utilities maintenance, and general industries as they provide durable performance and reliability, supported with industry-preferred Level 3 ANSI independent 3rd-party testing documentation. KStrong continues to expand its self-retracting device offering to the market in 2024 with the introduction of Arc-Flash rated Micron™ units and additional lifeline lengths within the BRUTE™ product brand.

SELF-RETRACTING LIFELINES

KStrong® New SRL ANSI Standard

New ANSI Standards for Fall Protection SRLs

ANSI/ASSP Z359.14-2021 standard has been recently updated to minimize confusion in the market as to proper use of Self-Retracting Lifelines (SRLs) in relation to anchor height requirements. Beginning in April 2022, KStrong began transitioning manufacturing of SRLs from current ANSI Class A/Class B to the new Class 1/Class 2 standard.

Classification Changes

SRLs will now be classified by two new class ranges: Class 1 and Class 2. The table below identifies Class 1 SRLs that are to be used only on overhead anchorages and are subjected to a max free fall of 2 feet or less. Class 2 SRLs can only be used in applications where overhead anchorages may not be accessible and a structural edge is used instead; these can withstand a free fall of no more than 6 feet over an edge.

ANSI Z359.14-2014 (Old)	ANSI Z359.14-2021 (New)
Class A -Tested overhead with 282 lb. weight -Must arrest fall within 24" -Average force less than 1,350 lbs.	Class 1 -Tested overhead with 310 lb. weight -Must arrest fall within 42" -Average force less than 1,350 lbs.
Class B -Tested overhead with 282 lb. weight -Must arrest fall within 54" -Average force less than 900 lbs.	Class 2 -Meets Class 1 standards -Tested at foot level with 310 lb. weight -Arrest distance printed on label and instructions

SRLs must have Class 1 or Class 2 clearly labeled on the product as per the image below.

Also included in the ANSI Z359.14-2021 standard are testing requirements for a SRL-P, which is a self-retracting lanyard worn by the user on a full-body harness to be used as a fall arrest connector.

Class 1 and Class 2 KStrong products are now available in the United States.

BODY WEAR

KStrong is proud to announce the launch of its premium line of full body harnesses, EndurX™. With its industry-leading, patent-pending user-friendly quick slide torso adjusters, deluxe shoulder and leg padding with reflective piping, and lightweight aluminum hardware, the EndurX™ includes features designed with the end-user in mind. EndurX™ harnesses rank number 1 in comfort and fit.

BODY WEAR

When it comes to your fall protection equipment, a full-body harness is one of the most important equipment choices you can make. While KStrong harnesses are built to meet or exceed ANSI standards and OSHA regulations, we've also designed comfort, lumbar support, positioning D-rings and accessibility into our body wear to provide workers with continued freedom of movement, sustained safety, and improved productivity while working at height or in confined spaces. KStrong Essential™, Elite™, and Epic™ harnesses provide workers with a very high degree of confidence, which directly affects the worker's productivity. While many of our safety harnesses can be used on most jobs, we also manufacture innovative full-body harnesses for specific uses within different industries such as Oil and Gas, Utility, Tower, and Wind Energy.

COMPETENT PERSON FALL PROTECTION CERTIFICATION TRAINING

OVERALL COURSE OBJECTIVE

Competent Person Fall Protection certification training course is designed to introduce safety professionals, construction inspectors and similar personnel with current and updated knowledge of the fall protection principles, hazard identification, fall protection systems, program development/implementation and relevant standards and regulations.

Course covers the use, selection and installation of conventional and non-conventional fall protection equipment. This course also addresses relevant fall protection regulations and fall hazard identification. These components, combined with the hands-on set-up of fall protection systems, instill a working knowledge of all the essential elements of a fall protection program. The course curriculum includes both classroom sessions and practical hands-on exercises.

Written and practical tests are administered to ensure that students understand the principles presented. Documentation is available to satisfy due diligence and regulatory requirements.

In addition, comprehensive training will be provided on proper inspection methods of Personal Fall Arrest Equipment.

Continuing Education Credits

This course qualifies for 1.6 Continuing Education Credits (CEU) which will be specified on each certificate received by attendees who complete their training.

ANCHORAGES

Selecting an appropriate anchorage connector for your fall arrest system is a critical element in protecting a worker from fall and confined space hazards. Designed to fit a broad scope of general and specific user applications, our offering of anchorage connectors meets those requirements head-on by providing a secure point of attachment. Fall arrest anchors are identified by what they connect to such as steel anchors, concrete anchors, roof anchors and specialty safety anchors designed for your unique applications. Your worker can work with confidence knowing each connector is rigorously Level 3 ANSI tested and meets or exceeds industry standards. For 2024, we are committed to expanding our offering of anchors to better protect your workers!

ANCHORAGES

Door Jamb/Window Anchor

UFA30401 | Door Jamb/Window Anchor, adjustable 23.6" - 49.2"

- KStrong Door Anchor provides a non-intrusive anchor point and can be easily installed inside the interior of a building or window opening enabling the most difficult jobs to get done safely and with confidence.
- KStrong Door Anchor can be installed by just compressing it against the door or window frame, jamming itself between the two vertical sides.
- It is constructed of Aluminum alloy, hence it is highly corrosion resistant and is lightweight, weighing less than 10.7 lbs.
- The arms of the KStrong Door Anchor are adjustable enabling installation on door/window frames of width from 23.62" to 49.21".
- Fast and easy Installation with built in adjustment knob hence no tools or drilling is required.
- Extremely portable design for easy transport, storage and usage. Every Door Anchor is provided with a deluxe carrying bag.

Specialty Anchor

UFA30420 - Off-set I-beam stanchion for approved horizontal lifelines

- Anchor post designed to be installed on metal I-Beam
- Can be used as a stand-alone anchor post or to form a horizontal lifeline along the length of I-Beam
- The post comes with a unique tilted design to allow unobstructed movement of the user during the construction of roofs or metal structure
- Span lengths are adjustable with help of intermediates
- Compatible with I-Beam having flange width of 5.9" (150mm) to 8.66" (220mm)

HORIZONTAL LIFELINES (HLL)

Specialty Anchor

Vertical Post for Containers

- Container anchor post is designed to provide a temporary anchor for working on top of 20 ft. - 40 ft. shipping containers.
- In addition to being used as a stand alone anchor post, it can also be used to form a horizontal lifeline over the top of a container depending upon the requirement of work to be done
- Comes with a side lock and tagline arrangement for easy and secure installation that can be performed by one person
- Four holes on the anchor plate (UFA30430) can be used for making connections as anchor points
- Consists of side handle with special grip for easy carrying and safe transportation
- Can be easily removed without damaging the container

EVAC-R+ Rescue System

UFX209070(150) and UFX209070(300) | EVAC-R+ Rescue System

The KStrong® EVAC-R+ Descender, Rescue and Lifting device is an automatic and controlled descent device designed for the lifting or lowering of an injured person.

- Rescue made possible from high level working platforms that require a simple rescue or evacuation solution
- Hand-wheel for lifting of injured and rescuer simultaneously
- A power drill can be easily utilized with the included 10mm Hexagonal head connector to assist in the rescue allowing the injured person to be raised up to the full length of the kit's rope.
- Controlled descent speed: 1m/sec [187 lbs. (85kg)] and 1.5m/sec. [374 lbs. (170kg)].
- Brake system - Automatic, redundant brake system with 2 fly wheel brakes.
- The maximum load of 628 lbs. (285kg) allows simultaneous descending of up to three persons.
- Alternating descending on both rope ends can be carried out to rescue more than three persons efficiently (shuttle system).
- Can be used with Kermantle Rope ø 11mm, EN 1891-A (EN 341, EN 1496), ANSI Z359.4:2013 & Kermantle Rope ø 9,6mm till ø 11mm acc. EN 1891-A (EN 12841)C

Ladder Rescue System

UFZ809030 | 20 ft. Rescue Ladder System

KStrong 20 ft. Rescue Ladder System has been designed for the self-rescue of a conscious user who has had a fall. The ladder kit allows the user to climb to safety with the added benefit of using a backup rope attached to the user which reduces the chance of a secondary fall.

- Rescue ladder kit with 20 ft. ladder and 6 ft. concrete embed strap with loop at both ends
- Equipped with kernmantle rope, rope grab and carabiners
- Simple and easy to deploy Fast Drop System using an existing or a temporary anchor point
- The added rope grab system allows the user to climb efficiently while safely reducing the risk of a secondary fall.
- Optimized for fast and easy rigging
- Only requires one person to operate
- 23 ft. of Rope
- Comes with convenient backpack style bag
- Total kit weight 8.84 lbs.

Meets ANSI Z359.18-2017

SPECIFICATIONS

- The IMPACT Cable Line Fall Arrest System meets all applicable OSHA codes and ANSI standards and is certified to EN795:2012 Type A, B, C, and CEN/TS 16415:2013. It is suitable for up to four (4) users simultaneously. It is also being certified by Sira (Certification Number: 11ATEX6276X) for ATEX to comply with use in explosive atmospheres which conforms to Norms EN 13463-1:2009 and EN 13463-5:2003. Shuttle conforms and is certified to EN795:2012 Type B anchor device.
- Flexible anchor line with linear elastic performance properties with a defined elastic coefficient. The impact load generated by a fall arrest event will not exceed 2,248 lbs. (10Kn) as applied to the structure. Energy absorber can absorb up to 5,753ft./lbs. (7800 joules).
- The fall arrest system will be suitable for unrestricted use by up to four users at any one time and any point along the length of the system including between two anchor brackets.
- The rooftop anchor posts are manufactured from 316 stainless steel, 6061 T6 Aluminum, 6005 T5 Aluminum which suitable for metal roof and PEB structures.
- The span distance shall be between 40 ft. (12m) to 50 ft. (15m) between end, corner, and intermediate anchor brackets.
- Wire Rope to be Ø8mm 7 x 19 or 7 x 7 316 stainless steel wire cable with a 7,643 lbf. (34Kn) minimum breaking load.
- The swage termination is manufactured from 316 stainless steel. The swaging is done using a 29,225 lbf. (130kn) hydraulic swaging hand tool and hexlock dies at 6 positions.
- Extremity (End), corner, and intermediate brackets manufactured from 316 stainless steel.
- Labeled according to applicable ANSI and EN 365:2004 General requirements for instruction for use, maintenance, periodic examination, repair, marking, and packaging in accordance with OSHA, ANSI and EN365.
- System Design, application, installation, maintenance, repair, annual inspection, and certification undertaken only by KStrong Registered Installers. Details provided upon request.

IMPACT
—LIFELINE SERIES—

The diagram illustrates a cable-stayed bridge system. A main cable is anchored at both ends to a structure (represented by a grey block). The cable passes through a series of components: a Shock Absorber (B), a Traveler (F), an Intermediate (E), and a Swaged Cable Extremity (D). The cable is also supported by a Swaged Tensioner (C) and a Corner Bracket (H). A Universal Extremity Plate (A) is shown at the top left. A Wire Rope (Cable Wire) (G) is shown in the center. Red lines connect the callouts to the corresponding components in the diagram.

FEATURES

- Certified for up to 4 users
- Manufactured from 6061 T6 Aluminum and 316 Stainless Steel
- Suitable for Standing Seam, R-Panel, Built-Up Membrane and Concrete roof profiles
- 8mm wire cable thickness (grade 316)
- Suitable for both fall arrest and fall restraint
- Built-in shock absorber with tension indicator
- Passed system operating temperatures between -40°C to +60°C
- Uses water proof rivets and self drilling screws to attach the system base plates to the roof deck. Depending on the roof deck profile, the use of toggle bolts may be used.

UFA55001(SUB1)	KStrong® IMPACT™ Low-Profile Base Plate for Metal Panel / R-Panel Roof Deck

WARRANTY & SERVICES

- All systems come with a warranty period of 12 months.
- All systems are thus further warrantied with 20 years provided they are inspected once annually according to the requirements of OSHA, ANSI and EN365.
- Competent Person Training on the Inspection, Use and Maintenance of any system will be provided along with Competent Person Certificate.
- Competent Person training on how to conduct periodic inspection will be provided.

RECOMMENDED PPE

While working on a roof the user can select from a range of Strong fall protection PPE to work safely with either Lanyards, Rope lines or SRLs in conjunction with a Full Body Harness.

GUARDRAIL

KStrong K-Rail™ non-penetrating weighted guardrail systems are designed to provide fall protection for those working at elevation or around floor openings. Unlike active fall protection components and systems such as full body harnesses and self-retracting lifelines, properly installed K-Rail guardrails do not require worker training in order for the workers to be protected. Because the K-Rail™ Guardrail system is non-penetrating, the threat of any permanent deformation to a roof deck is mitigated. Every jobsite has its own potential fall hazards. Our engineering department is available to help you quantify how much K-Rail™ Guardrail is required for any application. Please contact systems@kstrong.com for more information.

DROP PREVENTION

KStrong Kaptor™ tool lanyards are designed to reduce the risk of a dropped tool injuring anyone positioned below a worker. The worker's use of a tool securely attached to a Kaptor™ tool lanyard should significantly reduce the chance of an injury from occurring to workers or others below. Tool lanyards are designed to be attached securely at one end to a worker or to a suitable structure, with the other end attached to common hand tools. KStrong offers a variety of tool lanyards and attachments whose application is determined by the weight of the tool and how the lanyard is attached to a worker or to a structure. Please watch our growing video library for more information.

THIS. IS. A. GAME CHANGER!

Your KStrong® fall protection gear just got an upgrade like no other.

KStrong Compass™ is a cloud-based software app which relieves the user from a mountain of paper records. The unique AIR system (Automated Inspection Reminder system) reminds a user of a pending competent person inspection that is required to minimize accidents that may happen due to equipment that has not been properly inspected.

Compass™ Features

Introducing KStrong Compass™, the fall protection industry's first "free at your fingertips" mobile application for fall protection equipment asset management.

Pre-Use Inspection Instructions

The mobile app provides each user vital information on inspection and periodic maintenance needs and helps in increasing the life of the equipment.

Get Tech Data & Manuals

User Instruction Manuals, Technical Data Sheets, Declarations of Conformity, Product Images, Videos, PowerPoint presentations and more are available.

Track Usage

The KStrong Compass™ user management system allows equipment to be issued to individuals, thus ensuring accountability towards the upkeep of the equipment.
